Francesca Chiodi Group
Publications in 2003

Soluble factors released by virus specific activated CTLs induce apoptotic death of astroglialoma cell lines.
Brain Pathology 13, 165-175.

Astrocyte activation and apoptosis: contribution to neuropathology of HIV infection.
Brain Pathology 13(1), 84-94

Low frequency of plasma cerve-growth factor detection is associated with death of memory B lymphocytes in HIV-1 infection.

Surrogate markers as a guide to evaluate response to antiretroviral therapy.

Publications in 2002

Eidsmo L, Wolday D, Berhe N, Sabri F, Satti I, El Hassan AM, Sundar S, Chiodi F, Akuffo H.
Alteration of Fas and Fas ligand expression during human visceral leishmaniasis.

Current chemotherapy protocols for childhood acute lymphoblastic leukemia induce loss of humoral immunity to viral vaccination antigens.

Plasma levels of soluble CD27: a simple marker to monitor immune activation during potent antiretroviral therapy in HIV-1-infected subjects.

**Publications in 1999-2001**

Nonproductive human immunodeficiency virus type 1 infection of human fetal astrocytes: independence from CD4 and major chemokine receptors.

Elovaara I, Sabri F, Gray F, Alafuzoff I, Chiodi F.
Upregulated expression of Fas and Fas ligand in brain through the spectrum of HIV-1 infection.

High plasma levels of soluble Fas in HIV-1-infected subjects are not normalized during highly active antiretroviral therapy.
Elevated levels of soluble Fas and Fas ligand in cerebrospinal fluid of patients with AIDS dementia complex.

De Milito A, Mörch C, Sönnerborg A, Chiodi F.
Loss of memory (CD27+) B lymphocytes during HIV-1 infection.

AIDS 2001; 15: 1109-1113.
